

WORKING AT HEIGHTS

RIIWH5204E - Work safely at heights

COURSE OVERVIEW

'Working at height' is whenever people are at risk of falling from, into or through one level to another or at risk of hitting others below with falling objects.

When working at height, preparation and planning are essential. Falls from height can leave employees with permanent and debilitating injuries. Falls often occur from roofs, scaffolds, ladders, trucks and mezzanine floors or into pits or holes, although falls from less than one metre can result in serious injury.

COURSE DURATION

This course is one day.

DELIVERY & ASSESSMENT

This course is delivered and assessed face to face.

There are theory and practical training and assessment components to the course.

LOCATION

Public courses are scheduled frequently in Adelaide, Perth and Alice Springs.

Civil Train can come to your worksite to deliver training to a group of employees - please contact the office for a quote.

COURSE OUTCOMES

On completion of the course you will be able to

- Identify work requirements
- Identify work procedures and instructions
- Access and install equipment
- Perform work at heights
- Clean up work area

If successful, you will receive a Statement of Attainment and plastic card to keep in your wallet to show competency.

Industry recommends this course is renewed every two years.
